

**DISCOVERY**  
KEY COMPROMISE PROTECTION

**HM PRISON  
SERVICE**

# The Leading Key Compromise Protection System

## Overview

- Industry Standard System
- Prevents Key Compromise
- Improves Security, Control & Protection

## Features

- Robust Hardware
- Re-enforced Hole For Key Ring
- Modular System - Easy To Extend

## Benefits

- Ministry of Justice Approved
- Easy to Install & Use
- Round the Clock Monitoring
- Cost Effective Key Compromise Protection

# The Benefits of **Discovery**

**Eureka Discovery is not susceptible to interference from new generation technology such as:**

- LED lighting
- Wifi

**Eureka Discovery is our latest generation of key tagging systems reducing your carbon footprint by up to two thirds using 66% less energy than previous systems:**

- More energy efficient
- Reduced running costs

**Eureka Discovery's advanced design provides excellent performance:**

- Up to 9 metres tag detection range (specifically for vehicle lock applications)
- Coverage of tags whilst concealed in vehicles
- Extended range to cover double doors

**Eureka Discovery is cost effective key compromise protection:**

- The system has low running costs due to improved energy efficiency
- Maintenance costs are minimal for new Discovery systems

## What is Eureka Key Tagging?

For over 15 years, Eureka Key Tagging Systems have been the industry standard for key compromise protection in secure establishments.

Designed to aid the prevention of key compromise, Eureka key tagging will ensure your keys receive round the clock monitoring and provide an extra level of security, control and protection.

- Each key set is fitted with a Eureka Discovery RFID key tag.
- RFID detectors are installed at all entrance / exit points including vehicle locks.
- When the key set is detected at any entrance / exit point, an alarm is automatically raised alerting of the inadvertent attempt to remove the keys.

Using proven RFID (radio frequency identification) technology, our key tagging systems are extremely effective as a last line of defence to ensure keys DO NOT leave a secure establishment.
